Biomedical Equipment Technology

COLLIN COLLEGE

Modern medicine runs on technology and someone has to keep that technology in top working order. Graduates of Collin College's Biomedical Equipment Technology program have the training and experience to ensure lifesaving medical technology is ready when it is needed. This career is perfect for people with an interest in the growing healthcare field but who do not want to work with patients. Top employers include hospitals, medical offices, and large clinics which provide testing for patients.

Careers in Biomedical Equipment Technology

Medical Equipment Repairers
Avg. Starting Salary: $35,900
Average Salary: $57,100
Projected Job Growth: 24.4%

Other careers include engineering, sales, or service for equipment manufacturers.

The average salary listed reflects the mean average wage for workers in this industry, while the average starting wage is tied to workers at the beginning of their careers. The earning potential for employees with certifications and associate of applied science degrees may exceed the average salary.

*Data for Collin County obtained from JobsEQ and O*Net*
Note: Average salary for occupation as of 2023 and job growth projected from 2023-2029.

Available Degree

Associate of Applied Science
(60 credit hours)
